A perennial from the buttercup family, taller varieties of dolphin might require poles and will appreciate a windless location. [istockphoto.com](#) Whether you are a lawn care novice or a master gardener, everyone can use a little help around the yard. The flowers of the English garden in contrasting colours, shapes and heights should juxtapose neatly with hedges cut into a random pattern that balances traditional elegance with romantic fantasy to look like a garden straight out of a Jane Austen novel. This biennial self-seed symbolizes the circle of life, fertility and abundance. Plants grow in zones 4 to 10, but may require some shade during the hot afternoon. Typically surrounded by nature, the gardens feature lush plantations, winding paths, inviting benches and ornate iron gates. Related: These 10 flowering plants boast the largest flowering [istockphoto.com](#) This biennial native European self-seeder can reach 3 to 4 feet tall (and some grow up to 6 feet with care), providing additional height in a garden cottage. English rose hikers produce an abundance of small fragrant roses, grouped in large sprays, creating a cascade of colours, which usually bloom in late spring or early summer. [istockphoto.com](#) You don't get much more "English cottage garden" than this plant old and fragrant. All parts are edible; flowers are sometimes used in tea. They bloom from late spring to mid-summer, and even until frost. An old-fashioned favorite, hollyhock has had medicinal uses as herbal remedies in past eras. Their dazzling displays of flowers in a range of colors and styles such as single, double, spider, multiflorous and arruffled, belies their tenacity. Give them a rich soil, but don't smother them in mulch. Racemes become longer as the plant matures. Suitable for zones 3 to 7, this fast-growing deciduous shrub produces gigantic balls of flowers from spring to summer and even early autumn. [istockphoto.com](#) Provides the height of a cottage garden with holly trees, which typically reach a height of 8 feet. Sulphureus, or sulphureus cosmos) with yellow and orange blooms. In Greek, "daylily" means beauty and day, and these flowers get their name from the fact that each flower lasts only one day. Daisy-shaped white, pink and light purple flowers bloom throughout spring and summer. Foxglove comes with a couple of warnings. It lives on abandonment, tolerates poor soil and partial shade, and is generally resistant to disease. In addition, they are rarely prone to parasites or diseases. With 47 known species in its family, the perennial lavender can live from 5 to 15 years, and are annual in the colder areas. Its many bell-shaped tubular flowers grow on pointed spikes that bloom at the beginning of summer in shades of white, pink, lavender and purple. Light yellow and pink stems, as well as darker reds and intense purple, attract pollinators with their amazing flowers. Considered to be cold-season plants, violets can become sticky and struggle during the summer heat, although they can start flowering again in autumn. Slightly fragrant, these small plants (3 to 9 inches) prefer partial shade and rich, moist soils, such as those in the woods. First appeared in the 18th century as a reaction against the rigidly formal designs of the garden, the cottage garden is considered a romantic landscape. Reaching only about 2 feet tall, this small shrub balances the tallest flowers in the English garden. Cultivated in zones 4 to 9, diurnal lilies can thrive in full sun in the shade and in almost all types of soil, although they prefer fertile, well-drained and poorly cared for soil. But the most worrying thing is that all parts of digitalis plants, which in the past were used for medicinal purposes to treat heart disease, are toxic. Even if the leaves and flowers are edible, violets should be consumed in small quantities to prevent stomach upset. After flowering, the glossy leaves of these medium-sized bushy plants provide a pleasant setting for other flowers to bloom. However, roses need some pruning to maintain their best appearance and to prevent them from taking the place of a flowerbed. Lavender flowers are often used to make potpourri, sachets and essential oils, and the buds are also used in cooking or summer drinks. Appreciated for its delicate beauty, it is sometimes considered an invasive species, and its aggressive growth can cause damage if not pruned. However, because they are abundant flowerers, they can adorn a garden with beautiful flowers from late summer to early autumn. First, it can become invasive.
