capri 16.5 sailboat manual

Call Us at 18009597245 Mooring Cleats, Snubbers, Chafe Gear, Dock Lines etc. Technical Support Line Our free tech support line is manned by a small team of sailors with decades of experience. The Clubhouse Checkout out the peer forum where you can read about others boating experiences, post your questions, and even contribute your knowledge. We specialize in parts, custom upgrades, and accessories. Worldwide delivery available. It is based on the fact that the faster the motion the more upsetting it is to the average person. Consider, though, that the typical summertime coastal cruiser will rarely encounter the wind and seas that an ocean going yacht will meet. Numbers below 20 indicate a lightweight racing boat; 20 to 30 indicates a coastal cruiser; 30 to 40 indicates a moderate bluewater cruising boat; 40 to 50 indicates a heavy bluewater boat; over 50 indicates an extremely heavy bluewater boat. Capsize Screening Formula CSF Designed to determine if a boat has blue water capability. The CSF compares beam with displacement since excess beam contributes to capsize and heavy displacement reduces capsize vulnerability. The boat is better suited for ocean passages vs coastal cruising if the result of the calculation is 2.0 or less. The lower the better. Later renamed CATALINA 16.5. Please consent to allowing cookies and accept our Terms and Conditions. The Centerboard model features a powerful sailplan, balanced by the stable hull form and fiberglass centerboard and rudder. Adjustable hiking straps, tiller extension, adjustable outhaul, and sheet bag are all standard equipment. The Keel model is perfect for storing the boat on a mooring or dock most of the season. A molded-in sealed bilge sump is included. The high aspect keel is cast lead and attached with stainless steel keel bolts. Weve found a 3ringbinder version of the manual online from Catalina direct, but we are looking for the original smaller size manual to keep in a drybag on the boat. Would love any leads as to where we can find one! Thank you. We rigged ours at the lake for the first time. We figured it out. By continuing to use this site, you are consenting to our use of cookies. You should upgrade or use an alternative browser. I believe that Catalina started to manufacture the 16.5 in 1995, he tells me he thinks it is a 1998 but is not sure. I found a gooseneck on the Catalina Direct site, but it does not make sense to me how it would work . I also found a gooseneck pin on the ZSpar site Z1121X that looks like it would work, but the two sites do not reconcile the two parts. Which is the right gooseneck I need to buy 3 Side Stay Tension, How tight should the chain plates be 4 Is there a manual for the proper rigging of this boat 5 Do I need to worry about the Capri 16.5 turtling I have two small children 5 and 8 want to be safe. Thanks for the help, Bob Lots of good information there and folks famiar with the boat who are willing to answer questions. If you have the HIN I think this site will help you find the year I posted a copy of the owners manual including rigging instructiions on the Yahoo site a couple of years ago. We had a 2004 until we got 6footitis and bought the Capri 22. The Catalina Direct gooseneck looks like what I had. Theres a picture here that shows the gooseneck connected to the boom. Sides stays I had them fairly tight when the mast was up. My philosophy has always been that the uppers should be tight but a little flex in the lowers when the wind is up is ok. Trial and error will help you get them in the right spot. Turtling Yes, the Capri 16.5 can turtle if it goes over. Personally, I never dumped ours but I came very, very close on an evening when I went out with too much wind for a main with no reef points.<http://www.connect-senior.ch/uploads/userfiles/dynatronics-525-manual.xml>

Ive seen a couple of options used to help avoid turtling one is to stuff pool noodles down the top of the mast, which is what I did, but I dont know how truly effective that is. All of this info and more will be in the archives on the yahoo group.The boom end aluminum casting I have on my boom does not look like yours sorry no photo the boat is 100 miles away. I believe that my aluminum casting ZSpar boom end needs to be replaced to use the Catalina Direct gooseneck system like yours, they also offer the replacement end on the same page down the bottom. I am going to find a local sail maker and have reefing points put in as our normal wind in cape cod, ma is 1015MPH SSW most of the time, with gusts. Thanks for the quick response, Bob If youre going to leave the boat rigged, be

sure to get, or make, sail covers. My boat was 4 years old when we got it and the sails were pretty faded from the PO not covering them. My greataunt lived on the Cape for years, in Dennisport. These numerous subdirectories represent all my previous eBay auctions. Last Revised March 2012. These numerous subdirectories represent all my previous eBay auctions. Adjustable hiking straps, tiller extension, adjustable outhaul, and sheet bag are all standard equipment. A molded in sealed bilge sump is included. By Mark Pillsbury Updated April 18, 2019 In order to go cruising, most of us require a sailboat with a head, a galley, and bunks. The boat, likely a 30 footer and more often a 40 footer, will have electronics for navigation and entertainment, refrigeration if the trip is longer than a coastal hop, an engine for light wind, and, depending on our appetites for food and fun, perhaps a genset to power our toys and appliances. To go sailing, however, all we really need is a hull, mast, rudder, and sail. To experience the pure joy of sheeting in and scooting off across a lake, bay, or even the open ocean, there's nothing better than a small sailboat. You can literally reach out and touch the water as it flows past. You instantly feel every puff of breeze and sense every change in trim. Some of the boats in this list are new designs, others are timetested models from small sailboat manufacturers, but every one is easy to rig, simple to sail, and looks like a whole lot of fun either for a solo outing on a breezy afternoon or to keep family and friends entertained throughout your entire sailing season. This list is made up of all types of sailboats, and if youre looking for a list of some of the best small sailboats for beginners, youll find exactly that here. Any one of these boats could be labeled as a trailerable sailboat, daysailer, or even a weekender sailboat. Enjoy browsing!

<http://superbia.lgbt/flotaganis/1649496746>

Marblehead 22 Daysailer If you have an eye for elegant lines and your heart goes pitterpatter over just the right amount of overhang beneath a counter transom, the Marblehead 22 daysailer, designed by Doug Zurn and built by Samoset Boatworks in Boothbay, Maine, will definitely raise

your pulse. Traditional looking above the waterline and modern beneath, the coldmolded hull sports a deep bulb keel and a Hall Spars carbonfiber mast with a wishbone rig and squaretop main. The 11foot9inch cockpit can seat a crowd, and a small cuddy forward will let you stow your friends' gear for the day. www.samosetboatworks.com Marblehead Catalina 22 Sport Many a harbor plays host to an active fleet of Catalina 22s, a boat that's been a popular weekender over the years, given its basic amenities and retractable keel, which allows it to be easily trailered. Recently, the company introduced the Catalina 22 Sport, an updated design that can compete with the older 22s. The boat features a retractable lead keel; a cabin that can sleep four, with a forward hatch for ventilation; and a fractional rig with a mainsail and a rollerfurling jib. Lifelines, a swim ladder, and an engine are options, as are cloth cushions; vinyl cushions are standard. The large cockpit will seat a crowd or let a momandpop crew stretch out and enjoy their sail. www.catalinayachts.com Catalina Hunter 22 With its large, open transom cockpit and sloop rig, the Hunter 22 makes a comfortable daysailer for family and friends. But with its cuddy cabin, twin bunks, optional electrical system, opening screened ports, and portable toilet, a parent and child or a couple could comfortably slip away for an overnight or weekend. Add in the optional performance package, which includes an asymmetric spinnaker, a pole, and a mainsheet traveler, and you could be off to the races. The boat features a laminated fiberglass hull and deck, molded in nonskid, and a hydraulic lifting centerboard.

<https://cluster-consulting.com/images/cagiva-planet-owners-manual.pdf>

Mount a small outboard on the stern bracket, and you're set to go. www.huntermarine.com Hunter BayRaider from Swallow Boats Easy to rig and trailer, the BayRaider from Englands Swallow Boats is a relative newcomer to the smallboat market in the United States. Nearly all of its 19 feet 9 inches is open cockpit, though a spray hood can be added to keep the forward sections dry. The BayRaider is ketchrigged with a gunterstyle mainmast. The topmast and mizzen are both carbonfiber, which is an option for the mainmast as well. The BayRaider can be sailed with a dry hull in lighter conditions or with 300 pounds of water ballast to increase its stability. First launched in 1971, this is a line of boats that's attracted a true following among trailersailors. The P 19's fully retractable keel means that you can pull up just about anywhere and go exploring. Closedcell foam fore and aft makes the boat unsinkable, and thanks to its hard chine, the boat is reportedly quite stable under way. www.westwightpotter.com West Wight NorseBoat 17.5 Designed for rowing and sailing a motor mount is optional, the Canadianbuilt NorseBoat 17.5—one of which was spotted by a CW editor making its way through the Northwest Passage with a twoman crew—features an open cockpit, a carbonfiber mast, and a curvedgaff rig, with an optional furling headsail set on a sprit. The lapstrake hull is fiberglass; the interior is ply and epoxy. The boat comes standard with two rowing stations and one set of 9foot oars. The boat is designed with positive flotation and offers good loadcarrying capacity, which you could put to use if you added the available canvas work and camping tent. With a keel and centerboard, the boat draws just under 2 feet with the board up and can be easily beached when you're gunkholing. In the cuddy cabin you'll find sitting headroom, a pair of bunks, a portable toilet, optional shore and DC power, and an impressive amount of storage space.

The deckstepped mast can be easily raised using a fourpart tackle. The builder reports taking his own boat on trips across the Golfo de California and on visits to California's coastal islands. Montgomery makes 15foot and 23foot models, as well. www.montgomeryboats.com Montgomery With long overhangs and shiny brightwork, the CW Hood 32 is on the larger end of the daysailer spectrum. Designers Chris Hood and Ben Stoddard made a conscious decision to forego a cabin and head in favor of an open cockpit big enough to bring 4 or 5 friends or family out for an afternoon on the water. The CW Hood 32 is sleek and graceful through the water and quick enough to do some racing, but keeps things simple with a selftacking jib and controls that can be lead back to a singlehanded skipper. A topfurling asymmetrical, electric sail drive and Torqeedo outboard are all optional. The 17foot4inch Sun Cat, built by ComPac Yachts, updates the classic wooden cat with its fiberglass hull and deck and the easytostep Mastender Rigging System, which incorporates a hinged tabernacle to make stepping the mast a oneperson job. With the fiberglass board up, the 17foot2inch boat draws just 5 inches of water; with the board down, the 4foot5inch draft suggests good windward performance. Hull and deck are handlaminated fiberglass. The roomy cockpit is selfbailing, and the bow harbors a goodsized storage area with a waterproof hatch. www.catalinayachts.com Catalina Hobie 16 No roundup of small, trailerable, and fun sailboats would be complete without a mention of the venerable Hobie 16, which made its debut in Southern California way back in 1969. The company has introduced many other multihulls since, but more than 100,000 of the 16s have been launched, a remarkable figure. The Hobie's asymmetric fiberglassandfoam hulls eliminate the need for daggerboards, and with its kickup rudders, the 16 can be sailed right up to the beach.

Its large trampoline offers lots of space to move about or a good place to plant one's feet when hanging off the double trapezes with a hull flying. The boat comes with a main and a jib; a spinnaker, douse kit, trailer, and beach dolly are optional features. www.hobiecat.com Hobie Hunter 15 Novice sailors or old salts looking for simplicity could both enjoy sailing the Hunter 15. With a fiberglass hull and deck and foam flotation, the boat is sturdily built. The ample freeboard and wide beam provide stability under way, and the heavyduty rubrail and kickup rudder mean that you wont have to worry when the dock looms or the going grows shallow. The Super Snark, at 11 feet, is a simple, easily cartopped daysailer thats fit out with a lateen rig and sail. Both carry NorseBoats distinctive looking carbon fiber gaffrigged mast with main and jib a spritset drifter is optional, and come with a ballasted stub keel and centerboard. Sloop rigged, with a conventional spinnaker for downwind work, the boat is an easily sailed family boat as well as a competitive racer, with over 130 racing fleets across the U.S. Its roomy cockpit can seat six to eight, though the boat is often sailed by a pair or solo. Hull and deck are a fiberglass and balsa core sandwich. With the centerboard up, the boat draws only eight inches. The Venture features a large, selfdraining cockpit that will accommodate a family or pack of kids. A furling jib and mainsail with slab reefing come standard with the boat; a gennaker and trapeze kit are options, as is an outboard motor mount and transom

swim ladder. The deck and hull are laid up in a fiberglass and Coremat sandwich. At 9 feet, 8 inches LOA and weighing in at 88 pounds, the Taz is not going to take the whole crowd out for the day.

<https://southportrubbish.com/wp-content/plugins/formcraft/file-upload/server/content/files/1627335a185f80---briggs-quantum-service-manual.pdf>

But, with the optional mainsail and jib package main alone is for a single child, the Taz can carry two or three kids or an adult and one child, and would make a fun escape pod when tied behind the big boat and towed to some scenic harbor. It joins a line that includes the WR16 and WR17 trimarans. The Tango features forwardfacing seating, footpedal steering, and a low center of gravity that mimics the sensation of sitting in a kayak. It weighs 125 pounds including the outriggers and carbonfiber mast, is extremely stable, and has singlesheet sail control.
