On these pages you will find out about requirements, explosion protection concepts and other related subjects. As a national joint training initiative, CompEx is developed and implemented by the Engineering Equipment and Material Users Association EEMUA and JTL and is supported by the Health and Safety Executive HSE.We shall focus on details that are really important. You will find it far less stressful and even enjoyable. You are required to bring with you Photo Identification and suitable evidence that you are fully qualified in electrical or instruments or both. This could be e.g. NVQ Level 3 certification, apprenticeship indentures or an ECS JIB Gold card. Courses can be delivered in other languages, however this would need to be discussed prior to acceptance on the course. It is the responsibility of the person making the booking to make Roxby aware of this requirement. The EEMUA Publication 186 A Practitioners Handbook will be available in centre for the duration of the course. Also EEMUA Publication 214 Toolbox Guide will be issued to all candidates. Theory training is followed by practical training and assessments. Company Registration 07206012. VAT Registration 990208025. You need JavaScript enabled to view it.

Practical training and assessment takes place within a realistic simulated working environment which allows operatives to meet national competence standards.Valid for 5 years.I would highly recommend EPIT to others. Well done EPIT for all your hard work at keeping everyone safe when at your training centre. EPIT appears to have looked very closely at the Government guide lines and they have applied them with rigour through out the training centre. Everything from socially distancing measured in the classroom and workshop right through to the catering and welfare facilities. Hand sanitiser is readily available through out the whole building and people are encouraged to use it. Instructors gave clear and concise information and explained everything at a level which was easy to understand. Social measures were adhered to and hygiene standards very high. Staff were great and really helpful.A lot of information but plenty of time for questions. EPIT facility is excellent. Instructors were very helpful all the way through the course. The teaching staff and training facilities were very good. Instructors were extremely polite and helpful. Will

recommend and return. Highly recommend this place to everybody. Any questions asked were answered and explained. I will definitely train here again. Trainers outstanding. If someone didn't understand it was reiterated. The centre and facilities were first class. Food served every day was good and varied. I would recommend the course and centre. Practical facilities and course instructors were of a high quality. Course is very well presented. Enjoyable course with interesting content. All credits go to the teaching staff. I would recommend this EPIT course to others. Excellent facilities and friendly staff throughout. Would highly recommend this training centre for CompEx training.

Learn More Learn More Learn More Learn More Whether your business is local or global, we can ensure your products meet quality, health, environmental, safety, and social accountability standards for virtually any market around the world. We offer the following courses at our licensed CompEx training center in Houston, Texas, USA. Customized training at your facility may also be available. Ex F Foundation Course A nationally recognized certificate in the basic theory of hazardous areas. This course is part of the national scheme for the training and certification of core competence of personnel who work on equipment for use in explosive atmospheres. This course consists of classroom based theoretical practical training 50% and practical assessment and written examination. Ex12 Application Design Engineers When designing an electrical installation for use in explosive atmospheres there is a requirement to consider the design, selection and construction of the overall system. This course covers the application, design and selection of electrical equipment, and the requirements of IEC 6007914. CompEx training is aimed at competent electrical and instrumentation personnel. These personnel are involved in the selection, installation, inspection and maintenance of electrical or instrumentation equipment. This equipment is used in potentially hazardous and explosive atmospheres which can occur in working environments both onshore and offshore. CompEx Training Objectives. The objective of CompEx training is to deliver competence based training and assessment. Competency is focused on the selection and use of electrical apparatus in potentially explosive atmospheres. CompEx training helps organisations comply with the Electricity at Work Act, 1989, regulation 16. Specifically CompEx training will cover the following elements. Area Classification and Zoning. Gas Groups. Temperature Classification. Sources of Ignition. IP Ratings and Impact Protection.

Marking and Identification. Earthing and Bonding. Protection Methods in Detail. Wiring systems and Glanding. Permit to Work and other Documentation. Electrical Isolations. Installation, Maintenance, Inspection and Testing. CompEx Training Delivery. CompEx training is delivered as 50% theoretical and 50% practical. Training includes teaching aids, questionnaires and national competency assessment. Assessment includes the following four units. CompEx Training Certification. The Course duration is five days. Course cost for Full Course is 910.00 plus VAT per delegate and the Refresher is 520 plus VAT. The course is delivered at our training centre. The address is New Horizons House, New Bridge Road, Ellesmere Port, CH65 4LT. The maximum number of delegates per course is eight. Each delegate will require the following Personal protective equipment PPE. Overalls, safety boots or shoes and safety glasses. Open courses are also available, please call for scheduled dates and cost. To find out more about CompEx training read our " What is CompEx Training " guide. 2020 Available Training Dates Full Course 19th23rd October 9th13th November 23rd27th November 7th11th December Refresher 25th27th August 15th17th September 29th1st October 13th15th October 27th29th October 17th19th November 1st3rd December 15th17th December Enquire about course If you are human, leave this field blank. Please contact us to register your interest. The aim is to provide mechanical personnel with the knowledge of potentially hazardous explosive atmospheres and, on successful completion, will give them a nationally recognised certificate of core competence. Candidates wishing to undertake this course should have a mechanical background and will need to have a signed letter of competency from their employer. There is also an installation component within the assessment which requires the demonstration of safe and competent practice while working on process pipework. This will relate to the electrical installation, design, selection and erection in areas of explosive atmospheres. This could be a letter from your employer or certification of your engineering qualifications. Courses can be delivered in other languages, however this would need to be discussed prior to acceptance on the course. It is the responsibility of the person making the booking to make Roxby aware of this requirement. This is followed by training and multiple written assessments. Company Registration 07206012. VAT Registration 990208025. You need JavaScript enabled to view it. Instructional staff have over 140 years industrial experience between them and offer a balance of 50% theory and 50% practical with assessments across their courses to successfully achieve set outcomes and prove competence. Roxby Training Solutions also put together bespoke, UK based, hazardous area industry training programs for overseas clients using a series of subcontract training providers extending this to overseas delivery where opportunities present themselves. All courses are taught in English however other languages are available where required. Courses can be carried out at customers' premises if preferred, provided that facilities are suitable.

JTL who is the National training agent for the Electrical contracting industry has been appointed to develop, operate and manage the training provision globally and has licensed and accredited a number of centres to deliver the training and assessment. With its unique "Whole Body Vibration" concept, the Compex WINPLATE is confirming its technical advance with perfectly controlled vertical vibration, for a whole new level of working comfort. Vertical vibrations call upon the muscle reflexes. This is why up to 100% of muscle fibres work, as opposed to around 40% in a traditional training session. The muscle workout on the Winplate is complete because it works the whole muscle, and not just part of it. Benefits The body reacts by releasing key hormones that help to prevent bone degradation Each level includes a sequence of exercises specifically programmed to suit your objectives Tennis, Running, Soccer, Golf, Skiing, Cycling, Swimming, Triathlon.

That's why we at PhysioRoom like to break things down for you, and give you the lowdown on the latest, and most innovative technology on the market. Electrostimulation, as a concept, is very simple.
